

# Incident Response Runbook

## Phase 1: Detection & Triage

- Receive alert and validate severity.
- Assign incident handler and create ticket.

## Phase 2: Containment

- Isolate affected hosts from network.
- Capture volatile memory if required.

## Phase 3: Eradication & Recovery

- Patch vulnerabilities, remove malware.
- Restore from clean backups.

## Phase 4: Lessons Learned

- Conduct post-mortem within 5 business days.
- Update playbooks and controls.
